PERSONAL PROJECTS

Nutri-Tracker
▫ Developed an android app using Flutter as front-end, Dart for business logic. Users can signup using Google authentication. Once the user logged in the user has to count his/her BMI for getting nutritious meals, diet plans, and drinks.

NGO Web Site
▫ Worked on a Social-Work (NGO) website using HTML, CSS, and Bootstrap. Where our regular work will be shown on the website.

ACHIEVEMENTS

- Developed an Android App

- Developed a website where users can see our NGO works and regular updates.

- Helped On Institute Website which helped to make the site attractive.
